

INTELLIGENT AMI SYSTEM SOLUTIONS

OLD METERING SYSTEMS JUST DON'T MEASURE UP

Vulnerable and aging metering infrastructure is a liability that warrants a long-lasting solution. NextEra Infrastructure Solutions can simplify the path to modernization. Our experience and expertise provide our customers with easy and customized AMI upgrades, offering the ease of remote monitoring, managing, and controlling your energy and water systems and allowing them complete control and transparency to their customers.

AMI Upgrade Advantage:

- Remotely identify and isolate outage events, failures, and tampering
- Operational benefits in managing costs and conserving resources
- Outages are restored more quickly - repair crews are dispatched to exact locations
- More accurate metering and billing
- Labor savings with fewer onsite technicians
- Wirelessly perform proactive system maintenance
- Provides easy connection/disconnects via remote service

Electrical Meter Upgrade Advantages

- Help balance grid loads and enhance quality of service
- Aids the improvement of power quality due to easy voltage detection
- Facilitates increased customer safety with temperature data to determine overheating
- Outage maps provide crucial details during natural disasters

Intelligent Water Meter Upgrade Advantages

- Better pinpoint leaks
- Help improve water quality and conservation
- Supports in the account and reduction of non-revenue water
- Promotes improvement of consumption data and quality-of-water-supply information

NextEra's AMI Solutions provide better customer communication:

- Customers can start or stop service online
- Customers don't have to "call-in" outages
- SMS/email outage customer alerts for better customer experience
- Customer portals provide customer usage patterns and billing information
- Data provided to customer service supports further understanding and offers quick resolutions
- Customers avoid default with pre-pay billing options and plans
- Help reduce billing disputes by identifying over-usage data to customers before billing periods end
- Ping functionality assists in determining outage details, meter status, and outage causes

NextEra Infrastructure Solutions offers a customized AMI solution that makes sense (and saves dollars). The innovative technology in our advanced metering infrastructure takes on complex problems and solves them with simple solutions, resulting in increased efficiency, accuracy, labor savings, and better data to serve your customers than traditional meters.
