

Residential Fiber & Broadband Services

Empower Your Developments with Reliable Fiber Infrastructure

Fiber technology, with its increased bandwidth, data transmission over long distances, and enhanced security, is a key part of modern communication infrastructure. It addresses the need for quick and secure transfer of large data volumes. Given the trend of cord-cutting, fiber technology's role is crucial in ensuring smooth streaming on various devices including phones, TVs, tablets, and IoT devices.

Quality Fiber for Home and Business Owners

NextEra Infrastructure Solutions specializes in providing personalized fiber and broadband solutions. We not only offer an extensive range of services including fiber installation, operations, and 5G wireless infrastructure, but also supply all upfront capital required for these projects. By doing this, we can more easily adjust to meet evolving needs. We own and operate the fiber infrastructure but remain independent of any specific internet service providers (ISPs) that utilize our lines.

Our turnkey solutions incorporate techniques that expedite deployment, while customized strategies are implemented to minimize disruptions to the community and reduce costs through the implementation of "dig once" multi-conduit solutions. Our utility background, supported by being one of the largest implementers of infrastructure capital investment in the country each year, ensures that our practices are grounded in a strong foundation of expertise and reliability.

Why Choose Us:

- » Future proof, scalable network designs
- » Dig once, multi-conduit solution minimizes community disruption and lowers costs
- » Turnkey infrastructure speeds network deployments
- » Can support residential, mixed-use and master planned communities
- » Home and enterprise solutions
- » Minimum 1Gbps up/down symmetrical speeds
- » ISP agnostic and industry high door fees

Comprehensive, tailored fiber and broadband solutions

1Gig Up/Down Speeds for optimal streaming

Dig once, multi-conduit solution

Fully capitalized to cover any project size
